Changing Multifactor Authentication (MFA) Method

To manage or change the authentication method used for Microsoft MFA, the user needs to go to the following website:

https://account.activedirectory.windowsazure.com/proofup.aspx?proofup=1

The user can change the way they are notified by MFA and the user can also change the Authentication Phone number or Office phone number if needed.

Additional security verification

When you sign in with your password, you are also required to respond from a registered device. This makes it harder for View video to know how to secure your account

what's your preferred option?

We'll use this verification option by default.

Notify me through app ⌄

Call my authentication phone
Text code to my authentication phone
Call my office phone
Notify me through app
Use verification code from app or token

☑ Authentication phone	United States (+1) ⌄	432-638-xxxx
☐ Office phone	Select your country or region ⌄	1385
		Extension
